

The 4th Jalview and JABA Residential Workshop

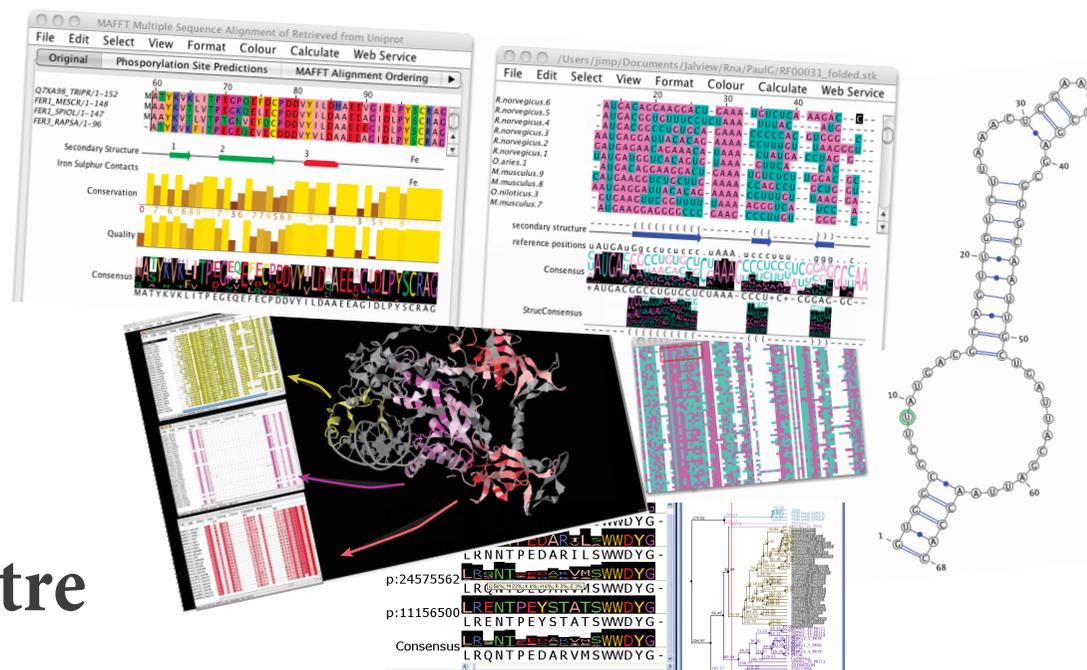

Medical Sciences Teaching Centre
University of Oxford
12 - 13th December 2013

Registration costs £35

*Includes dinner at St. Catherines College
+ special rate for overnight accommodation*

<http://bit.ly/jalviewOx2014>

Registration closes 4th December 2013

Jalview is a workbench for creating and analysing sequence alignments that works with proteins, DNA, and RNA, and can visualise phylogenies, 3D structures, and annotation on the alignment.

In this workshop, learn how to:

- Create, analyse and annotate alignments for publication
- Visualize protein and nucleotide annotation and molecular structure
- Predict secondary structure, disordered regions and functional sites in proteins
- Set up your own virtual bioinformatics analysis server
- Add Jalview to your website
- Extend Jalview for your own needs
